Mechanical thermostatic panel heaters

Key features

- TPRIII (MT) models have programmable 24 hour timers
- TPRIII (MT7) model has a programmable 7 day timer
- Full or half power output selection
- Adjustable thermostat (5-30°C)
- Convected heat for rapid warm-up. Suitable for domestic or commercial use
- Frost protection setting
- Front heat outlet grille for efficient heat circulation
- Lockable dust cover
- Detachable hinged wall mounting bracket for fast installation and easy cleaning

The range

Designed to complement Creda storage heaters. TPRIII mechanical thermostatic panels are ideal for any areas which require heating for short periods of the day. Cost effective, they offer an efficient way to extend existing heating systems and come with various control options to suit different applications.

The TPRIII mechanical thermostat panel heaters offer a versatile choice of models with built-in timer options or panels with no controls at all.

- **TPRIII M** mechanical thermostat without timer
- **TPRIII MT** mechanical thermostat with 24hr timer
- **TPRIII MT7** mechanical thermostat with 7 day timer

Technical specification

- Element - mineral-filled sheathed type
- Thermostat - capillary type
- Finish - white powder coated steel
- Protection - auto reset thermal cut-out
- IP rating - IPX4 (splashproof)
- Supply - 230/240V AC single phase

Product variations

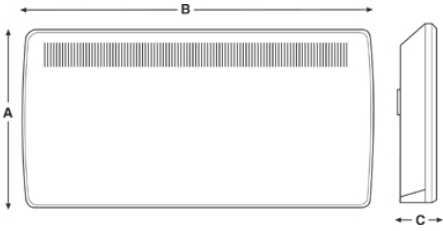

Name	Loading	Height A	Width B	Depth C	Weight
TPRIII 500M	0.5kg	430mm	450mm	108mm	4.8kg
TPRIII 750M	0.75kW	430mm	620mm	108mm	6.2kg
TPRIII 1000M	1kW	430mm	620mm	108mm	6.2kg
